## IMPORTANT INFORMATION ABOUT RESTORATION

### NOT ALL COINS CAN BE RESTORED

Please review the following information and carefully consider whether a coin is a candidate for Restoration before submitting. **All Customers submitting coins for Restoration will be charged an evaluation fee, whether or not the submitted coin is restored.**

### TYPES OF RESTORATION ISSUES

**TONING:** Removing unattractive toning is the most common use of Restoration, though not all toned coins may be candidates for Restoration. Coins that suffer from abnormal and unsightly toning caused by the presence of foreign or caustic substances may be restorable. Coins that have been artificially toned may be restorable, but often the artificial toning covers another problem such as cleaning or altered surfaces. Attractively toned coins will not be restored to a "white" color, as it is not appropriate for us to make all coins white and destroy natural, attractive toning.

**SPOTTING:** The other most common type of successful Restoration is the lightening or elimination of spots. Spots can usually be lightened or eliminated from silver, nickel, and clad coins. One exception is whitish "milk spotting" on modern .999 silver coins struck by the various world mints. The United States Mint has publicly acknowledged the problem of milk spots, attributing the issue to the manufacturing process of the silver planchets. Spots on gold coins are difficult to improve, and spots on copper coins can almost never be eliminated without damaging the coin.

**HAZE:** Restoration to remove haze from the surface of a coin is often quite successful. However, haze sometimes covers scratches, marks, or other surface problems, and thus removing the haze may have a negative impact on the appearance of a coin.

**WEAR:** There is no Restoration process which can reverse wear. If a coin's surfaces show wear due to normal circulation or for any other reason, the wear cannot be reversed. Wear permanently alters the condition of a coin. Any coin submitted for Restoration with the intentions of reversing wear will be returned as-is and the Customer will be assessed an evaluation fee.

**CLEANING:** There is no Restoration process for a coin that has been cleaned. When a coin is cleaned, the surface luster and original patina are removed. Often the surfaces exhibit hairlines as a result of contact with a cloth, a brush, or another medium used to clean the surfaces. Hairlines cannot be removed. Surface luster and original patina cannot be restored. Cleaned coins should not be submitted for Restoration. The coin will be reviewed and returned unchanged, and the Customer will be charged an evaluation fee.

**DAMAGE:** Coins that have been damaged will not be repaired by PCGS. This includes coins that have been scratched, scrapped, whizzed, tooled, holed, plugged, exhibit rim damage, or have been altered in any way. PCGS does not add

or remove metal or in any way move metal during the Restoration process. Damaged coins cannot be restored using the non-invasive processes that are used during the PCGS Restoration process. Damaged coins that are submitted for Restoration will be returned as is and Customer will be charged an evaluation fee.

**CONCEALED PROBLEMS:** Many coins suffer from multiple problems. For example, there may be unsightly spotting or toning, but underneath the toning there is substantial surface damage. PCGS Restoration may be able to remove the toning but cannot address the surface damage. If such a coin is submitted for Restoration, at best, it will be returned in a "Genuine" holder.

### METALS

Restoration processes and success depend a great deal on the metal content of a given coin. What follows here is information on the general efficacy of Restoration techniques on various types of metals.

**SILVER:** Restoration of silver coins can often be quite successful.

**GOLD:** Gold coins can usually be restored if the problem is haze or discoloration. Spots on gold coins usually cannot be removed.

**NICKEL:** Nickel coins can often be restored if the problem is unattractive toning, haze, or spotting; however, success rates for Restoration of nickel coins is less than that of silver coins.

**COPPER:** This is one area where Restoration seldom works. PCGS will never use any harsh techniques which effectively strip the surface of the coin, nor will we use any techniques which could change the color and surfaces of the coin. Because of this we will not attempt to restore many darkened or toned copper coins.

**CLAD:** The post-1964 clad coins can often be successfully restored depending on the problem. Success rates are similar to those of nickel coins.

### RESTORATION CANDIDATES

The coins that have the best results from the PCGS Restoration service are:

**Silver coins with unattractive toning** - It is usually rather easy for professional experts to remove unattractive toning from silver coins, and it has been a market-accepted practice for decades. Removing toning usually does not affect a coin's surface and is many times undetectable to even expert eyes.

**Gold, silver, nickel, and clad coins with haze** - Many coins develop a hazy look over time, and occasionally coin doctors will artificially haze a coin to deceptively enhance its appearance. It is usually very easy to remove haze from coins.

**Brilliant proof gold coins** - The appearance of brilliant proof gold coins that have haze or discoloration can often be improved with Restoration techniques.

**Spotted nickel, silver, and clad coins** - Spots can usually be removed from nickel, silver, and clad coins, provided the spots have not corroded the surfaces of the coin. Spots usually cannot be removed from gold and copper coins.

### RESTORATION TIPS

Restoration works in many cases and can generally produce wonderful results on coins. However, there is no guarantee that Restoration will increase the value or result in a higher grade for a coin.

Here are a few points to consider before submitting coins to PCGS Restoration:

**Make sure the coin's value merits the Restoration fee** - An inexpensive coin might have a lower value than the Restoration fee for that piece. PCGS Restoration cannot transform a 20€ coin into a 500€ coin. Unless the fee-to-value ratio is not a concern, coins should be submitted to PCGS Restoration only if they are worth at least 100€.

**Do not expect miracles** - PCGS Restoration can enhance the value of many coins, but it cannot make a worn coin new, reverse cleaning on a cleaned coin, or turn an MS62 into an MS67. Some Customers have even submitted counterfeit coins for Restoration - we can't make a counterfeit coin genuine!

**Remember that Restoration doesn't always work** - Sometimes the outcome will be very positive, sometimes the Restoration results are neutral, sometimes the outcome will result in a more negative appearance for a coin. And sometimes we cannot provide Restoration service. However, we do require an evaluation fee on all submissions regardless of their final dispositions.

Read the above information carefully and only submit coins to PCGS Restoration that fit the criteria listed above.

### ADDITIONAL INFORMATION

**GENUINE OPTION** - All coins submitted are subject to being deemed as Genuine (not gradable). PCGS may determine the coin's condition has been permanently altered either by man-made actions or through environmental causes. Select one of the two options for Genuine Service. Only one option is allowed per form. For additional information please visit [PCGS.com/Grades](https://www.pcgseurope.com/Grades).

**SECTION 6** - You must initial your acknowledgement of the PCGS Restoration Service fees. Failure to initial this section will delay the processing of your order. You must initial your acknowledgement that PCGS Restoration Service is for raw or PCGS-graded coins only. Coins in other third-party holders may be submitted only if you authorize PCGS to remove the coin(s) from their holder following the initial evaluation of the coin(s). You acknowledge coins removed from other third-party holders do not qualify for a grade guarantee. You indemnify PCGS from any damage that may be done to the coin(s) during this process. You also acknowledge that some coins may have problems that are not apparent until removed from their holder. Failure to initial this section will delay the processing of your order.

Customer acknowledges and agrees that PCGS may adjust/increase any fees as necessary without explicit customer notification.

IN NO EVENT SHALL PCGS OR ANY OF ITS AFFILIATES, OR ANY OF ITS OR THEIR RESPECTIVE EMPLOYEES, OFFICERS, DIRECTORS OR AGENTS, BE LIABLE TO CUSTOMER OR ANY OTHER PARTY FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
11. In the ordinary course of its grading operations, PCGS (i) compiles data regarding each coin submitted for restoration and grading, including, but

12. If any coins are being submitted for a third party, Customer represents and warrants that such third party has agreed and accepted this Agreement and has signed a duplicate copy hereof where indicated. Customer agrees to provide that third party-signed copy to PCGS at any time upon its request.
13. It is further agreed as follows: These Terms and Conditions shall be governed by the laws of France. Exclusive jurisdiction shall be granted to the Commercial Court of Paris for any dispute relating to these Terms and Conditions. Customer accepts and agrees not to challenge the jurisdiction or venue of such Court or assert that it is not a convenient forum.
14. The terms and provisions in this Agreement and the Customer Agreement, if applicable, constitute the entire agreement of PCGS and Customer (and any third party for whom Customer may be acting) regarding, and supersede all prior agreements and understandings (written or oral) between or among such parties relating to, the subject matter hereof. Except for the dispute resolution provision set forth in Section 24 of the PCGS Authorized Dealer Agreement (which shall control over Section 13 of this Agreement), if it is determined that there are any inconsistencies between this Agreement and the Customer Agreement, then this Agreement shall control. If any term or provision of this Agreement is determined, by a final and non-appealable ruling or order of a court of competent jurisdiction, to be invalid or unenforceable under applicable law, such invalidity or unenforceability shall not affect the validity or enforceability of any of the other of the terms or provisions of this agreement.
